Codebug Hackathon - Judging & Evaluation Criteria

Judging Criteria Breakdown:

Uniqueness of Idea (5 Points)

Is your idea innovative and different from existing solutions? Creativity and originality will earn you higher marks.

Technical Knowledge (5 Points)

How well do you understand the technologies used in your project? A deep understanding of frameworks, databases, and integrations will help you score better.

Presentation Skills (5 Points)

How well do you communicate your idea? Confidence, clarity, and structured delivery matter. Make sure to keep the audience engaged.

Business Potential (5 Points)

Can your idea be scaled into a real-world product? Judges will evaluate market fit, monetization strategies, and potential user base.

Scoring System & Selection:

Each batch will have 2 judges who will individually score teams.

The final score will be the average of both judges' scores.

Based on these scores, the top 10 teams will move to the next round.

Pro Tip:

Focus on technical implementation and innovation to maximize your score. A strong tech stack, proper execution, and a clear roadmap will make your project stand out.
